EXPLOSION VENT

ADVANTAGES

- Equipment certified to ATEX, in compliance with NFPA
- Maintenance-free
- Different sizes available
- Passive explosion protection system
- Safe venting on outdoor installations
- Simple construction, highly reliable

Application	 Can be used on all dry dust applications which require explosion protection For metal and organic explosive dusts Also applicable for high-vacuum applications
Installation Options	 Explosion vent panels can be configured to all Gold Series dry dust collectors (outdoor installation) This component allows venting into a safe outside area Vent panels will be factory installed
Comment	 Damaged vent panels must be replaced after an incident of explosion We supply equipment which is compliant according to regional regulation such as ATEX or NFPA
